## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group V, claims 19 and 20, in the reply filed on June 10, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-18 and 21-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pines et al (US 5,852,024).

Claims 19 and 20 are drawn to a method of improving liver regeneration by increasing IGFBP-1 expression in hepatocyte cells, comprising administering a compound of the formula of claim 19 (e.g. halofuginone).

Pines et al teaches that the administration of halofuginone following surgery or other trauma to the liver promotes healing of the organ (column 10, lines 48-57). Pines et al does not explicitly teach that this method improves liver regeneration by increasing

IGFBP-1 expression; however this activity is an inherent property of the compound (halofuginone) and is necessarily present. It is noted that In re Best (195 USPQ 430) and In re Fitzgerald (205 USPQ 594) discuss the support of rejections wherein the prior art discloses subject matter which there is reason to believe inherently includes functions that are newly cited or is identical to a product instantly claimed. In such a situation the burden is shifted to the applicants to "prove that subject matter shown to be in the prior art does not possess characteristic relied on" (205 USPQ 594, second column, first full paragraph).
